Abstract (en)

[origin: EP1860272A2] The door has a fixed part (1,6,7), a mobile part and a seal. The seal is formed to seal the upper end of the mobile part with the fixed part. A seal housing (8) has a movable seal strip (9) attached in the seal housing, a release for releasing a movement of the seal strip and a stop element for the release. An independent claim is also included for a seal, particularly base seal, for a sliding door.
