Abstract (en)
[origin: EP1860295A2] The system has an exhaust gas pipe orifice (7), which is arranged in a section of a vehicle rear part (8a). The exhaust gas pipe orifice is connected with two exhaust gas pipes of the system via a holding device. Exhaust gas inner pipes (5, 6) are arranged between the exhaust gas pipe orifice and the exhaust gas pipes. The exhaust gas inner pipes are held on the exhaust gas pipes in an inserted manner and are connected with the exhaust gas pipe orifice in a fixed manner such that a passage channel (K) is formed circumferentially between the exhaust gas inner pipes and the orifice.
