Abstract (en)

[origin: EP1859709A1] The device comprises goods package (W), selected from multiple goods packages provided in compartments (C). The goods packages are supplied to a goods collection bar (4), where cash table (2) and a price detection mechanism is provided. The device comprises a propelled tilted base implemented at the lower end of a memory cell (13,13') for goods package, which ejects the selected goods package. A support element is introduced in the memory cell while moving the tilted base away, and holds the goods packing.
