Abstract (en)
[origin: US2006191222A1] Laminated flooring planks include decorative motifs, mechanically embossed-in-registration surface textures, recessed perimeters, and locking mechanisms. By arranging portions of the decorative motifs along edges of a flooring plank, a periodic flooring pattern larger than an individual plank and that spans across both the length and width of a number of planks may be formed by placing identical planks adjacent to one another in a horizontal direction and adjacent in a vertical direction.
