Abstract (en)

[origin: WO2006100515A1] A control system (1) adapted to provide an IT structure for a building is disclosed, including a plurality of interconnectible units (3) each including Ethernet capability with I/O serial connections, a head end unit (2), and a room unit (4), the units being connected in series and being modular whereby to provide an IT system for a whole building. A unit (3) for use in such a single network structure is also disclosed, comprising a first connector for supporting an in-bound feed from a source external to the unit and a second connector adapted for data distribution to a data recipient element.
