Abstract (en)
A shelf stand assembly has a shelf stand (10) and at least one positioning assembly (20). The shelf stand (10) has a side surface and a slot (12) formed in the side surface. Each positioning assembly (20) has two mounting tabs (21)(22) mounted in the slot (12) slidably. People can place a containing element between multiple sets of the shelf stand assemblies, and move the mounting tabs (21)(22) along the slot (12) to clamp the containing elements and adjust position, such that the shelf stand assembly is convenient to use.
