Abstract (en)

[origin: DE102006026055B3] The device comprises a transverse bar, a head rest supporting element (4) and a clamp connection (100) for continuous adjusted fixing of the head rest supporting element at the transverse bar. The head rest supporting element is introduced in the recesses of a retainer, where the recesses are arranged one above the other. The transverse bar has a boring, which is introduced into a centering sleeve. The clamp connection is operated by screwing the screwing element in the centering sleeve, and head rest supporting element is introduced to the transverse bar. An independent claim is also included for a wheel chair with a height adjusting head rest device.
