Abstract (en)
[origin: EP1862274A1] The processing device (10) has a driven endless belt (2) supported by guide devices in the region of a guide cam (K). The guide devices are driven by a controlled drive (A) to adjust the guide cam. This drive has several drive elements spaced out from each other along the guide devices. This enables the printed products (3) to be positioned for a frontal cut.
