Abstract (en)

The invention is a new covering for buildings in general, consisting of elements like tiles, bent tiles, sheets or plates, sheaths, and so on, wherein one or more of said elements comprises/comprise one or more layers of spheres and/or microspheres made of glass and/or ceramic and/or plastic and suited to reflect and refract the light incident on them, and wherein said spheres or microspheres are made adhere directly or indirectly to part or the whole of the surface of said elements through the application of at least one layer of paint and/or bonding agent and/or binder and/or another suitable product.
