Abstract (en)
[origin: EP1862715A1] Pressing device for axial displacement of two coaxial parts which can be displaced only under high pressure, a coaxial housing, which when closed has a coaxial annular insertion edge for entry into the part to be pressed, a press plate inside the housing, with a coaxial annular insertion edge for insertion of the second part, and a number of annular pressure cylinders. The device includes an axially moving press plate with an insertion edge for entry into (sic) the second part.
