Abstract (en)  
[origin: EP1862751A2] The present invention refers to a modular refrigerating component, preferably to a refrigerating component for a so called no-frost freezing apparatus. According to the invention it is provided for that both a feeding pipe (8) for cooling fluid and return pipe (9) for cooling fluid can be connected to a refrigerating component (7) on the side facing a door (1) of a freezing apparatus, said pipes (8, 9) are lead from a compressor (5) to connecting points on the refrigerating component (7) in an insulation of a back (13) and top (6), and drop down towards the refrigerating component (7) from the top (6) directly in front of said connecting points.
