Abstract (en)
[origin: WO2006103259A1] The invention relates to an energy-absorbing device for a safety fixing system, comprising two parts which can move frictionally in relation to one another such as to absorb energy. The invention is characterised in that the device comprises means for adjusting the frictional force between the two parts. The invention also relates to a safety fixing system comprising said energy-absorbing device. The invention is suitable for safety systems which, for example, make use of a lifeline.
