Abstract (en)  
[origin: WO2006103017A1] The invention relates to a printing device (1) comprising a housing (2) and an inkjet printing head (3) which is arranged therein. Said printing device is used to print out electronically filed data on a printing area, for example in an internal device memory. Said inkjet printing head (3) can be displaced in relation to the printing area in the direction of printing and can be arranged in rigid or adjustable manner in the housing (2) in relation therewith, such that no separate drive is required for the advancement thereof. Said housing (2) comprises a gripping area (4) so that it can be used manually by a user and can be freely displaced during printing at least in the direction of printing for the advancement thereof.
