Abstract (en)

[origin: EP1865125A2] Mount (10) for raising and supporting a plastic sheet partition (11), comprising a locking element (20) for locking the plastic sheet, an adjusting element (33) for adjusting the mount to a suitable length between the floor (31) and the ceiling (24), and a compression element (30, 33) for bracing the mount in place. The bottom piece (21) and top piece (22) of the mount's locking element can be interlocked by friction and/or the magnetic force between the pieces. In addition, it may have at least one spike (27), which penetrates through the plastic sheet. The parts (21, 22) of the locking element have been connected to each other with a string or a line. The compression element is a flexible or tightenable compression element (33).
