Abstract (en)

[origin: EP1865135A2] The fitting has a u-shaped glider (1), and a u-side piece that forms a fixing side piece (3), with which the glider is fixed on the inner side of the sliding leaves (6, 6') at the bottom. Another u-side piece forms a guiding side piece, which is engaged with a sliding head (5) in a guiding rail (9). A fixing bolt (2) is fixedly connected with the sliding leaves, with which the glider can be fixed at the sliding leaves in the hanging condition of a sliding door. The glider is detachably connected with the fixing bolt.
