Abstract (en)
[origin: WO2006105681A1] The invention relates to a grate bar for a cleaning device of a spinning preparation machine, particularly for a blow room machine or carding machine, with a free surface, which can be advanced to an opener roller of the spinning preparation machine, and with a setting surface, which adjoins a delimiting straight line that delimits the free surface while being located upstream with regard to the direction of rotation of the opener roll. A first half-plane, which originates from the delimiting straight line and which is tangent to the free surface, and a half-plane, which originates from the delimiting straight line and which is tangent to the setting surface, contain a cutting edge.
