Abstract (en)
[origin: DE202005005508U1] Piston comprises a permanent magnet arrangement (27) segmented in its peripheral direction and having magnet segments. An annular recess is formed as an annular groove (23) with a radial opening (24) into which the magnet segments are inserted forming an annular configuration. Preferred Features: The magnet segments are polarized with the same orientation, preferably axially polarized. The permanent magnet arrangement comprises magnet segments with the same bending length.
