Abstract (en)
[origin: WO2006120086A1] A cooling zone (6) of a refrigerating device is subdivided by a first partition (29) into a storage zone and an air distribution zone (27, 31). An air supply inlet and an air outlet (37, 33) open into the air distribution zone, and a plurality of holes (30, 32) are formed in the partition (29) for letting air through from the air distribution zone (27, 31) into the storage zone and vice versa.
