Abstract (en)

[origin: WO2006106093A1] An engagement system for CDs, DVDs, photographs, color slides and 5 other similar objects to be retained in suitable supports, characterized in that flexible tabs protrude from the rim of recessed seats (3A; 13A; 23A; 33A; 42A; 52A; 62A; 72A; 82A) provided in flat supports (S) in order to accommodate the discs (1) or other similar objects to be retained, the tabs being substantially parallel to the bottom of the receptacles and being 10 shorter than the depth of the receptacles, so that after the momentary flexing imposed by the passage of the object to be retained they can return spontaneously to the initial configuration or in any case be arranged above the inserted object, hindering its accidental escape but not preventing its manual removal, since in this circumstance it can flex outward.
