Abstract (en)
[origin: WO2006105832A1] The invention relates to a plug-in connection (1) comprising a plug and an associated socket that is fixed within a front plate. The plug is secured against being pulled out in the plugged-in state in the socket by means of a securing element (20) which is provided with at least one locking element (24) and at least one covering part. The securing element (20) is unremovably connected to the socket and/or the front plate with the aid of the locking element (24) while the covering part of the securing element (20) covers a grip area (13) of the plug and/or clamps the wire (15) behind the grip area (13). Also disclosed is an associated securing element (20).
