Abstract (en)

[origin: WO2006105773A2] According to a received deviation request message which is sent from a mobile radio communication terminal and which demands a deviation of the at least one multi-media message to a deviation address which is provided in the deviation request message, a multi-media message coming into the multi-media message relay device, and which is addressed to the mobile radio communication terminal, is deviated to the deviation address.
