Abstract (en)
[origin: WO2006090013A1] Interlocking means for inter locking at least two PCB's (Printed Circuit Boards) (1, 2) of a mobile Phone in a fixed and positioned relation to each other. According to the invention the interlocking means comprise: a first opening (5) in a first PCB (1), a second opening (6) in a second PCB (2), a first interlocking element (3), which extends through the first opening (5) and through the second opening (6), and a second interlocking element (4) which extends at least through the second opening (6), whereby the said first and second elements can be fitted as counter parts into a space defined by the first and second openings.
