Abstract (en)

[origin: EP1867243A2] The hood (2) has a continuous elastic wire (4) extended from the bottom of the chin towards a nape, where the hood is made of GORE-TEX(RTM: waterproof and breathable fabric). The elastic wire is fixed on the hood at the front and freely slides in a thickness (5) of the hood towards the rear. The wire leaves from the thickness of the hood at the rear through an orifice (3) and is prehensible for being pulled. A blocking unit (6) is displaced on the wire and supported against the orifice to maintain locking.
