Abstract (en)

Cap (1) for opening a container (3) for pourable products having a breakable region (4), said cap comprising a collar (2) substantially fixed to said container over at least part of said breakable region and a perforation element (5) that extends, at least partly, in correspondence of said breakable region and that it is hinged to said collar and rotatable with respect to said collar between a position external to said container and a position inside said container, the cap being characterized by said perforation element (5) being provided with at least one perimeter portion (7) carrying a plurality of teeth (6) projecting from the lower surface (8) of the said perforation element (5) and leaning towards the said breakable region (4) of the said container (3) when said perforation element (5) is external to the said container (3).
