Abstract (en)
[origin: EP1867801A1] A sheet metal cladding panel (1) for covering roofs and walls of buildings, comprising an elongated sheet metal member forming a web (2) of the panel, which has upwards folded flanges (3, 4) along the two elongated edges of said web (2) of the panel (1), a first (3) of said upwards folded flanges being folded outwards and downwards along its upper edge to form a first lap (6) and a second (4) of said upwards folded flanges is folded inwards and downwards along its upper edge to form a half lap (8). The invention further includes a system and a method for cladding roofs and walls with at least two such panels (1).
