Abstract (en)

[origin: EP1868043A2] The arrangement comprises a front side (4) mounted, in a ductile casing (13), on a body (1). The front sides (4,7) entering into the body are supported at the periphery of the cylindrical casing (6), where the lateral surface is formed as a photo-electrical coating. The casing is supported by a circular coiled surface of the body. A pressure body (12) is impinged on the casing under the impact of a groove nut (11). An independent claim is also included for a printing unit with a cylinder arrangement for electrographical pressure unit.
