Abstract (en)

The collet (1) has a junction point (8) with an inner end of a hairspring (2), and a lateral recess (10) provided on a zone (7a) of the junction point, where the zone is a junction zone between elastic deformable arms (3). The recess is conformed so that the distance (R) between the junction point and a center (O) of a balance staff (6) is not modified during driving of the collet on the balance staff, where the collet has triangular shape. Independent claims are also included for the following: (1) a hairspring-collet assembly (2) a method for designing a collet of a clock (3) a method for forming a collet.

Abstract (fr)

Une virole d'horlogerie (1) destinée à être chassée sur un axe de balancier (6) et comprenant un point (8) de jonction avec l'extrémité intérieure d'un spiral (2), est caractérisée en ce qu'elle comprend en outre, dans la zone (7a) du point de jonction (8), au moins un évidement (10; 18) conformé pour que la distance entre le point de jonction (8) et le centre (O) de l'axe (6) ne soit sensiblement pas modifiée lors du chassage de la virole (1) sur l'axe (6).
