Abstract (en)

[origin: WO2006106012A1] The invention relates to a sensor device for a packaging machine. Said device comprises at least one conveyor means (21, 32) of a packaging machine (18), which displaces at least one material (19), which is to be packed and to be detected, to various stations (1 - 12) of the packaging machine (18). According to the invention, at least one x-ray source (33) and one detector (37) are provided for irradiating the material (19) which is to be detected and which is arranged between the x-ray source (33) and the detector (37).
