Abstract (en)

[origin: WO2006108305A1] The invention relates to a method for production of a tamper-proof packaging (V), whereby recesses (3) are formed in a formed strip for accommodating a product for packaging and at least one security mark is applied to the packaging. According to the invention, the at least one security mark is applied before the forming of the recesses (3) to a region of the formed strip which remains largely unchanged during the forming.
