Abstract (en)
[origin: WO2006108801A2] The invention relates to a method and a system for the synchronisation of data between applications. According to said method, the data is exchanged at least partially between the applications, said exchanged data being synchronised with the data that is present in the respective application. To simplify the synchronisation process, according to the invention an identification that signifies incompleteness is assigned to the data.
