Abstract (en)
[origin: WO2006108379A1] Upon a request, a first communication session and a second communication session are formed from a common communication session. Upon a request to combine the communication session subscriber communication devices in the common communication session, one of the two communication session control servers requests a common communication session from the other communication session control server by means of a merger request message. One of the two communication session control servers creates the common communication session.
