Abstract (en)
[origin: EP1870343A1] The container has four panels fixed on four posts by two fixation units in the form of large and small snails, to allow the rotation of each panel with respect to a base. One of the fixing units includes fingers (37) arranged on the panel and a slot situated on one of the posts. The fingers slide and pivot inside the slot for permitting horizontal folding of the panels on the base. The slot is provided with an opening by which the panels pass through during their assembling and/or disassembling.
