Abstract (en)
[origin: EP1870447A1] Solid granulate composition (A) comprises at least a surfactant, where (A), after sieve analysis with a sieve, exhibits a grain size distribution accordance to DIN ISO 3310-1 and the grain size distribution is determined graphically by remote relay switch block-chart according to DIN 66145 and the following data such as d_m value of 0.5-1.5 mm; d_{63.3} value of 0.5-1.5 mm and n value of 1-10, should be fulfilled. Independent claims are included for: (1) a solid cleanser comprising (A); and (2) the preparation of solid detergent and cleanser comprising a scaffolding material, bleaching agent, complexing agent and additive, and subsequently adding the premixture to (A).
