Abstract (en)

[origin: EP1870527A1] The device (1) has a housing (5) fastened on a sanitary article (2) and mounted a pushbutton (7) for actuating a drainage valve. A cable (17) connects the pushbutton to a closure body, which is mounted in a displaceable manner in a housing of the drainage valve. A changeover device is mounted at the housing of the drainage valve, and is changed over under tension in each case of opening and closing the drainage valve. The changeover device has a changeover part and a rocker, which interacts for opening and closing the drainage valve.
