Abstract (en)  
[origin: DE202006009651U1] A lighting arrangement has a number of linearly arranged housing elements, which are located at least partly along a platform, in which the housing elements are partly transparent to light and within the housing elements are provided light sources for illuminating the platform together with ballast devices, mainly adjacent to one another. Along one side of the housing element, additional LED-light sources are arranged and control devices are provided for the LEDs, such that train arrival can be optically indicated.
