Abstract (en)

[origin: EP1870906A1] A device for concentrating 99m Tc pertechnetate and a method thereof are disclosed. The device includes a concentration device, a control device and a central processing unit. The concentration device is for concentrating 99m Tc pertechnetate, the control device connects with each members of the concentration device, and the central processing unit is used for saving an automatic control program. The automatic control program is run by the central processing unit so as to detect and monitor weight as well as activity of the concentrated 99m Tc pertechnetate. Due to the automatical control, the concentration quality and production efficiency of the 99m Tc pertechnetate are improved. Moreover, the radiation dose received by users is reduced.
