Abstract (en)

[origin: WO2006098965A1] A cleaning tool (100) generally comprises a hub (108) having a longitudinal axis (110) and a plurality of cleaning members (106). The cleaning members, formed of a fibrous material, are connected to the hub. In accordance with one embodiment, the cleaning members are distributed along the longitudinal axis. Also disclosed is a floor cleaning machine (102) that includes a mobile body (150), the cleaning tool (100) and a motor (112). The mobile body supports the cleaning tool and the motor and is configured to travel over a surface (104). The motor is configured to drive a rotation of the cleaning hub about the longitudinal axis.
