Abstract (en)
[origin: WO2006109247A2] The invention relates to an articulator comprising supports (4), between a planar upper piece (1) (with a front tooth guide pin (2) embodied at the front end) and a planar lower piece (3) parallel thereto, which support the upper piece (1) and which may be supported by means of a support surface (4a, 4b) in the region of a lower end on a base. At least a part of the supports (4) are made from a carbon material.
