Abstract (en)

[origin: WO2006113820A1] A tampon applicator for expulsion of a tampon. The tampon applicator has a tampon holder tube and optionally a plunger. The tampon holder tube has a hollow interior portion, an interior surface, an exterior surface, a longitudinal axis, an outer perimeter, a first end dimensioned for insertion into a vaginal cavity, a second end positioned oppositely to the first end, a force controller, and at least one side expulsion member. The side expulsion member has a weakened region located at its base. The tampon is housed within the hollow interior portion of the tampon holder tube in a pre-expelled position. A plunger may also be slidably mounted in the hollow interior portion of the tampon holder tube and adapted to expel the tampon through the force controller.
