Abstract (en)
[origin: WO2006104385A1] The invention relates to a cleaning device for cleaning a dispensing aperture (11) or the like with a cleaning fluid, and to a method in which such a cleaning device is used. The cleaning device comprises a cleaning housing (1) which at least partially bounds a cleaning compartment (6) and can be placed against or around the dispensing aperture in a sealing manner. The cleaning housing comprises an inlet (3) for feeding in the cleaning fluid, an outlet (4) for discharging the cleaning fluid, and at least one channel for forming a cleaning jet, which channel opens out in the cleaning compartment. The cleaning housing comprises a cup-shaped wall, which wall delimits the cleaning compartment and can be placed with a free circumferential end in a sealing manner against or around the dispensing aperture.
