Abstract (en)
[origin: WO2006112847A1] Drain cleaning apparatus (10) comprises a housing (12, 14, 16) in which a drain cleaning cable (40) is coiled and from which the cable is displaced for introducing an outer end (46) of the cable into a drain to be cleaned. The housing is stationary and the cable is rotated about its axis relative to the housing by a drive motor (M) coupled to an end of the cable. A manually operate cable feeding device (180) can be coupled with the housing for feeding the cable outwardly and inwardly relative to the housing.
