Abstract (en)
[origin: DE202005006248U1] The double exhaust system has a first pipe (12) and a second pipe (14), each directing an exhaust flow and both interconnected by a brace (10). The brace consists of a first and a second part, each of which is double-layered at least on the end allocated to the respective pipe, with a connecting section on the opposite end for connecting to the connecting section of the other part. Each part of the brace has two spaced apart clips on the end allocated to the pipe.
