Abstract (en)  
[origin: WO2006131462A1] The invention relates to an instrument panel comprising a glove box cover, the instrument panel and the glove box cover each comprising a surface skin and a lower foam layer, one of the foam layers comprising a first recess. The instrument panel also comprises a locking mechanism for locking and unlocking the glove box cover, and a switch for actuating the locking mechanism. The instrument panel is characterised in that the switch is arranged in the first recess of the foam layer beneath the surface skin.
