Abstract (en)

[origin: DE102005018015B3] A measuring probe (11) measures the temperature in an interior chamber (6) of a case (2), and transmits a signal to a controller (8) through a probe antenna (14) and a sending/receiving antenna (12). A transparent electromagnetic radiation cover (15) and the sending/receiving antenna are arranged in the interior chamber. The sending/receiving antenna has an illumination mechanism (7) for illuminating the interior chamber.
