Abstract (en)

[origin: WO2006111626A2] The invention concerns a cryptographic device (6) comprising a terminal (1) and a mobile telephone (2) capable of exchanging data via a wireless link (5), said cryptographic device (6) being adapted to use public key cryptographic protocols with other cryptographic entities (4, 43), and the secret key of the cryptographic device is stored in the mobile telephone (2) and not in the terminal.
