Abstract (en)

[origin: EP1872671A1] The flow type body (60) has a suction device for sucking off feed air from a pneumatically aided tobacco stream. The suction device has a suction opening arrangement (180), where an opening surface of the arrangement increases along a transportation direction (91) transverse to the tobacco stream. The opening surface increases in a conveying direction of a tobacco conveyor that is attached to the flow-type body.
