Abstract (en)

[origin: EP1873326A1] The system has a mounting profile (4) with profile sections (6, 7), and a covering profile (5) attached to the profile (4) to form a space corner. The profile sections are swivelable over a hinge joint (8) about an axis parallel to a longitudinal axis of the two profiles. The sections have recesses (9, 10) for the profile (5), where the profile (5) is attached in a snap-on connection in the mounting profile. The retainers of the profile sections of the mounting profile are formed as grooves with a dovetail cross section. The locking units of the profile (5) are designed as a PVC-profile.
