Abstract (en)
[origin: EP1873339A2] The door system has a housing with an inner space, in which components of the system are arranged, where the housing exhibits a base profile (5) and a hood profile (7). The hood profile is detachably mountable at the base profile in a fixing area (11), and the hood profile has a coupling surface, which is hinged in a receiving surface of the base profile. A locking device is formed by a projection and grooves, and locks the hood profile in a rotating position against the base profile, where the locking device is designed in a hinge (8).
