Abstract (en)

[origin: EP1873472A1] The firearm has a barrel (1) and two chambers (2, 3) functionally cooperating with the barrel. The chambers are adjusted with respect to the barrel, where the two chambers have different inner geometry for respectively receiving a telescopic munition (4) and a munition (5) with a case. The two chambers are integrated in a positioning drum or rotary drum, where an empty chamber is integrated between the two chambers.
