Abstract (en)

The present invention is related to a delegate unit (1) for use in a conference system comprising a first module (10) arranged for operating said delegate unit in a wired mode, a second module (20) arranged for operating said delegate unit in a wireless mode and a motherboard (5) provided with a physical interface (30) for connecting with either said first or said second module. The invention further relates to a conference system (100) comprising at least one such delegate unit (1) and a central unit (2) arranged for connecting with the delegate unit.
